NASA JSC Astrobiology Education and Public Outreach

jsc astrobiology institute
for the study of

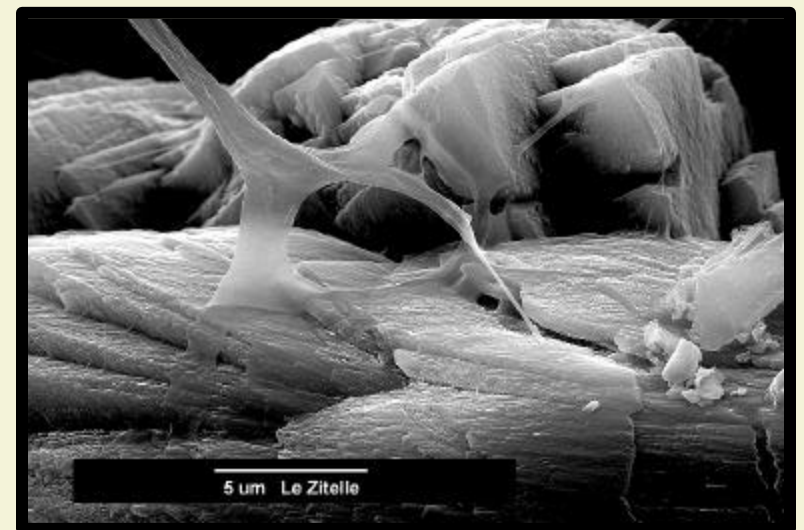

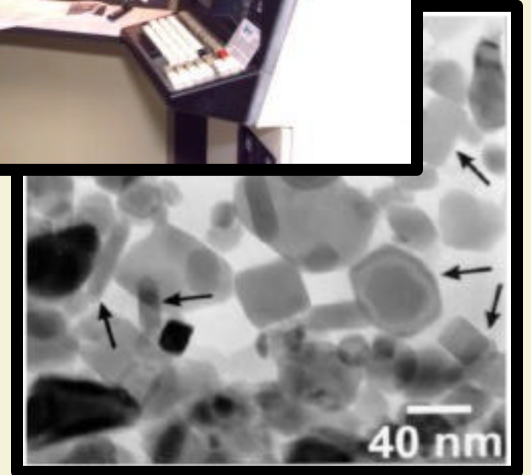

We are a team of
scientists and educators
working together.

jsc astrobiology institute
for the study of

Our education outreach
reflects the sample science
focus of JSC Astrobiology
research.

Astrobiology Education Collaborations

- NAI Central
- NAI Research Centers
- Funding Leverage
- Museums and science centers
- Office of Space Science

OSS Collaborations

- Minorities Outreach Grant
- Informal Education

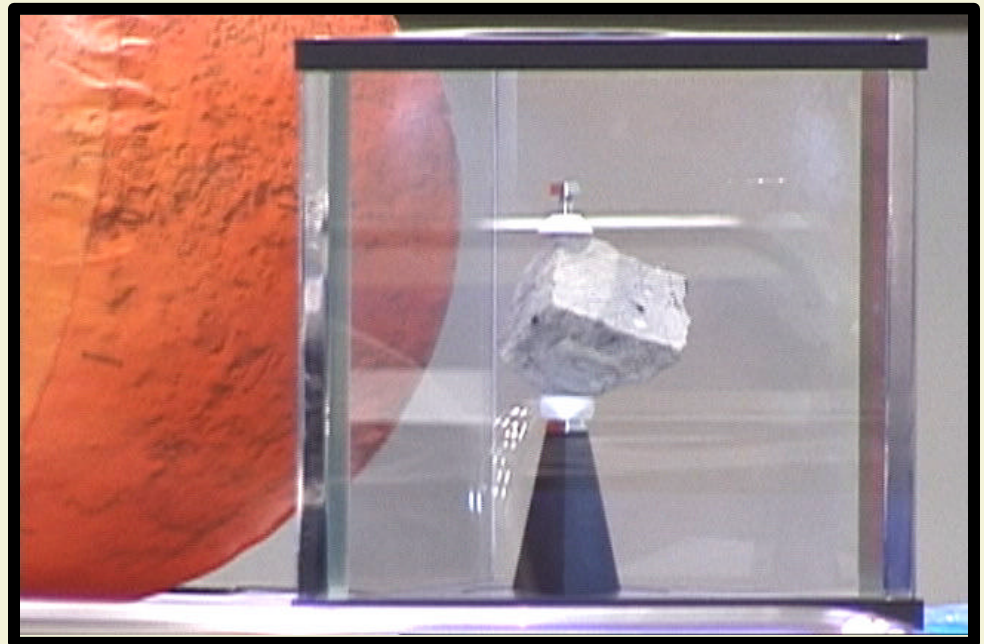

Minority University Collaborations

- Professors
- Students

What we do!

- Share science focus
- Conduct workshops
- Public Outreach
- Work with university students
- Produce classroom activities and products
Fingerprints of Life? CD

Future Education and Public Outreach

- Continue team effort to share sample science
- Continue collaborations with NAI, Research Centers, NASA programs, and universities
- Seek new collaborations to share planetary protection
- Work with museums and science centers to help share astrobiology science content and excitement with the public
- Use the funding synergism
- Continue aggressive outreach in informal settings
